Activating and Setting Up

1

To avoid injury, read all operating instructions in this guide and safety information in the *Important Product Information Guide* at www.apple.com/support/manuals/before using _____.

What You Need

To use you need:

- A new wireless service plan with the carrier that provides service in your area
- A Mac or a PC with a USB 2.0 port and one of the following operating systems:
 - Mac OS X version 10.4.10 or later
 - Windows XP Home or Professional with Service Pack 2 or later
 - Windows Vista Home Premium, Business, Enterprise, or Ultimate edition
- Display resolution on your computer set to 1024 x 768 or higher
- iTunes 7.5 or later, available at www.apple.com/itunes
- An iTunes Store account (a major credit card is required to open a new account)
- · An Internet connection

Activating Before you can use any of

Before you can use any of setures, you must activate by signing up for a service plan with the service carrier in your area and registering with the network. If you already have a wireless account with the carrier, you may be able to upgrade your account to work with or keep using your old phone and add a new line for (Some accounts may not be upgradable.) You may also be able to transfer your current phone number to or get a new one.

For more information about including videos about how to activate and use it, go to:

www.apple.com/

5

Inserting the SIM Card

In some regions, you may need to purchase the SIM card separately and insert it into before activation. Read the documentation that comes with the SIM card for instructions.

If your carrier gave you a PIN number to use with your SIM, you may need to enter the PIN before activating

Activate ___

- 1 Download and install the latest version of iTunes from www.apple.com/itunes.
- 2 Connect to a USB 2.0 port on your Mac or PC using the dock and cable that came with

Unless your keyboard has a high-powered USB 2.0 port, you must connect to a USB 2.0 port on your computer.

3 Follow the onscreen instructions in iTunes to activate and sync with your contacts, calendars, email accounts, and bookmarks on your computer.

A single checkmark in "Set Up Your syncs all these items automatically. Or you can use iTunes to customize the information you sync, and to sync your ringtones, music, photos, podcasts, and videos to see the following section.

You can disconnect from your computer after "Waiting for activation" appears on the screen. When activation is complete, is activated appears on the screen. This means that is fully functional and you can use all of its features.

Important: If you are migrating your current phone number to activation may take from several hours to a day and migration of your number may take several days, depending on your location and previous carrier.

Syncing with Your Computer

When you connect to your computer, iTunes syncs with the information and media on your computer, according to how you've configured the sync settings in iTunes.

You can set iTunes to sync any or all of the following:

- Contacts—names, phone numbers, addresses, email addresses, and so on
- Calendars—appointments and events
- Email account settings
- · Webpage bookmarks
- Ringtones
- · Music and audiobooks
- Photos
- Podcasts
- Videos

Ringtones, music, audiobooks, podcasts, and video content are synced from your iTunes library. If you don't already have content in iTunes, the iTunes Store (available in some countries) makes it easy to purchase or subscribe to content and download it to iTunes. You can also add music to your iTunes library from your CDs. To learn about iTunes and the iTunes Store, open iTunes and choose Help > iTunes Help.

Contacts, calendars, webpage bookmarks, and photos are synced from applications on your computer, as described below. Contacts and calendars are synced both ways between your computer and New entries or changes you make on are synced to your computer, and vice versa. Webpage bookmarks are also synced both ways.

Email account settings are only synced from your computer's email application to

This allows you to customize your email accounts on without affecting email account settings on your computer.

If you like, you can set to sync with only a portion of what's on your computer. For example, you might want to sync only a group of contacts from your address book, or only unwatched video podcasts. You can adjust sync settings whenever is connected to your computer.

Important: You can connect and sync with only one at a time. Disconnect one before connecting another. You should be logged in to your own user account on the computer before connecting On a PC, if you sync more than one to the same user account, use the same sync settings for each.

Setting Up Syncing

You use the settings panes in iTunes to specify the iTunes content and other information you want to sync to

Set up syncing

- 1 Connect to your computer, and open iTunes (if it doesn't open automatically).

 Unless your keyboard has a high-powered USB 2.0 port, you must connect to a USB 2.0 port on your computer.
- 2 Select in the iTunes window (below Devices, on the left).
- 3 Configure the sync settings in each of the settings panes.
- 4 Click Apply in the lower-right corner of the screen.

 The following sections provide an overview of each of the settings panes.

 For more information, open iTunes and choose Help > iTunes Help.
